FLORENCE, - SEPTEMBER 27, 1890 STABBED TO DEATH BY TWO MEX-

Mines and Surroundings--Political Corr. Phenix Herald.

GLOBE, Ariz., Sept. 15th, 1890. Final creek winds gently down the northern slope of the Pinal mountains emptying its waters into Salt river some fifty miles distant. On narrow mesa between the stream and the adjacent hills, and about thirty-five miles from Salt river lies the little town of Globle. Though not yet incorporated, it is the capital city of Gila coun-

producing camp. The principal business street is the only street where they belong.

idle, with a view to purchasing or leasing, it. If so, Globe will receive a new boom.

Should they begin operations it is believed. Should they begin operations it is believed | the arms of the victim.

miles from here. Globe is the outfitting point for all their apprehension seems good. these places and the market for farmers

on Salt river north of here. Politics are warming up a little, though candidates are all good natured yet.

The Democratic ticket is in the field at work upon the case. and the Republicans meet next Saturday to select at least a portion of the next county officers, The interests of Gila county will be

ooked after in the next legislature by one Republican at least and possibly by Heavy rains have made excellent range for stock and swollen the Gila so that mails and freight have been greatly re-

Preserving an Arizona Land Mark.

Phenix Herald. The Casa Grande ruins have dwindled sadly since Coronado first saw them 350 times destroy the bark and cause it to years ago. They were still considerable when Father Kino passed that way in New Orleans, La., late as 1846 Lieutenant Emory reported But this year the Government sent an in-

the rolling plain on which it stands.

The bill was supposed and was, originally, a measure to protect each county-of this territory from being overrun by packed up his traps and left for greener organs The planes possessing the avention of the "serse stringer" and the hospital cases of other counties and same, used exclusively in their planes. had become a regular practice with cer-tain counties instead of taking care of its own sick and disabled in its own hospital to ship them into some other county, and other sections of the country, and as such it will undoubtedly be re-enacted the coming legislature, with the faulty term which has been construed by the democ-racy to exclude foreign born citizens from the hospitals to which they are justly en-titled admission, expunged from its construction. The democratic party in the house passed the bill as it now stands and any criticism on the republican party or any member of it is simply a dishon-

est attempt upon the sincerity of the citizens of the territory and an insult to their intelligence that is inexcusable. Save Young Rabbit Skins.

Phenix Herald. It appears now that the multintiduous abbit, which has thus far proved a source

f discomfort rather than a joy forever to alifornia cultivators and the desert reclaimers of Arizona, is not without its pecuniary value in the world's market. According to the English Leather Trade's Circular, the trade in rabbit skins in Australia and New Zealand has devel The Head Center-Tranquilty Company of Tombstone may resume work soon.

In the past five weeks Redewill has had all he could do selling, renting and tun-ing pianos and organs. He disposed of a goodly number of instruments necessitat-ng his ordering eight more from the that had been tampered with recently in an unprofessional manner by traveling tuners. Redewill says that all these amting piano agents and tuners help his business considerably and change dull imes into brisk business for him. He leaves in the morning on his second trip this summer for Coronado. from whence he will return in three weeks with his nly and other Phoenicians.

Bullion Shipments.

Judge Vanderlip who is in the city from Crittenden reports the shipments of bul-lion, gold, silver and copper from that station for the year ending June 30th to be between \$400,000 and \$500,000 worth. This includes Washington Camp, Har-shaw, and the El Plomo mine at Salero. The figures certainly indicate a healthy pulse down that way.

Tucson Citizen.

It is reported that Fred W. Smith, late receiver of the U. S. Land Office, is act-concerns in Sonora that are giving bril-

3,000 receiver of the U. S. Land Office, is acting as ticket agent at Victoria, B. C., for a Puget Sound steamer line. Mr. Smith said to a gentleman he spoke with that he expected to come back to Tucson soon and square up old accounts.

Pasturage for Cattle and Horses.

W. E. Pomeroy of Mesa city has 640 acres of alfalfa with volunteer barley for pasturage. The land is divided into lots. If the principal city of the territory is Tucson. It contains, according to the census 5095 inhabitants. In 1880 its population was 7007, and it has, therefore decreased 1912, or at the rate of 27.29 per pasturage. The land is divided into lots. If the principal city of the territory is Tucson. It contains, according to the census 5095 inhabitants. In 1880 its population was 7007, and it has, therefore decreased 1912, or at the rate of 27.29 per vention meets next Saturday, and will no doubt nominate Geo. Shute, for sheriff, very low at Wildman & Co.'s. TONS OF FRUIT.

Remarkable Showing for Our Growing Industry.

S. F. Call. Freight Agent Smurr, of the Southers Pacific, estimates that during the fruit season of 1890-91 not less than 10,000 caroads of fruit-fresh, dried and canned will go from California for consumption Assuming that each car contains only 10 tons, this would represent an export from the state of 100,000 tons 000 tons of green fruit have already been shipped from Sacramento, an increase of nearly 25 per cent over last year. This is a remarkable showing for an in-

lustry which is not more than ten years The total shipments of one of the oldest and most productive fruit regions of Europe through the port of Malaga only amounted in the best year on record to about 24,000 tons of raisins, besides a having a general circulation therein, for not few oranges, lemons and grapes. Cali- less than four months from the first publicafornia will nearly equal that this year and in a few years it will surpass it. All over the world fruit-dealers measure fruit by the box, by the pound or by the bushel. Here we measure it by ton. The other day it was stated in the papers that our apricot crop would amount to 10,000 tons. An eastern visitor was amazed at the statement. He said he could understand a pound of apricots or a basket, but who ever heard of a ton of apricots? Was there so much the luscious fruit in all this world? If California ships 100,000 tons of fruit

his year to the east it is reckoned that the export will yield, gross, to the state something like \$10,000,000, which is very little less than the gross product of our wheat shipment in some years. And the difference between the two is that the fruit export is certain to increase, while the wheat export is not. Each year witnesses the conversion of a certain proportion of wheat land into fruit, and t is fair to assume that the conversion will continue. The point of this development is its bearing on the growth of the state. The true measure of state growth is the

noney value of its chiefs products. States like Kansas, Iowa, and Nebraska. which only produce two or three articles, which command so low a figure in the market of the world that it is often a question whether it is worth while to grow them at all, cannot possibly advance as rapidly in wealth and popula-tion as states whose products yield \$50 or more to the acre. In the long run men will strike their tents where labor applied to the soil will yield the largest ncome. And in this respect there is no State in the Union which can compare
