of sending the old steamer Beaver, that has lain a wreck at the entrance to Vancouver harbor for so many years, to the World's Fair, was dispelled yesterday morning as the steamer broke up, her engines, smokestack and boiler falling into the water. High tide and the swell from the passing steamer Yosemite caused the breakup. Four men, who were on the Beaver getting wood as relics, were nearly drowned. The Beaver formerly belonged to the Hudson Bay Company, having sailed from England around the Horn, and was the first steamer on the

The Beaver, which four years ago ran aground in the Narrows at the entrance to Burrard Inlet, B. C., was a relic of which Burrard Inlet, B. C., was a relic of which Vancouver city was justly proud, and no visitor at all acquainted with the history of the Pacific Coast ever thought of leaving the town without first having a look at the picturesque old vessel as she lay on her beamends among the rocks at the foot of Brockton Point, Vancouver's Golden Gate Park. For a long time after her voyage around the Horn the Beaver made regular trips between San Francisco and Victoria, and nearly every oldtimer in British Columbia can recall the time when she was considered (although not nearly so large as the Spreckels' tug Relief) a palatial and model boat.

She made occasional trips across to the mainland and navigated the Fraser River when its now fertile and thickly populated valley was the haunt of bears and Indians. The old pioneer, therefore, was very closely identified with the prosperity of Eureka's most westerly province, and was very highly prized in consequence.

most westerly province, and was very highly prized in consequence.

She was rebuilt some time in the seventies and for eight or ten years was used only as a freight boat. It is alleged by many that owing to her age and antiquated machinery she was purposely run ashore and this story seemed credible when one saw the position in which she lay. It was quite possible at low tide for relic hunters to climb over her mussel-covered bulwarks to the decks on which, despite the persevering onslaughts of both vandals and the sea the cabin, pilet-house and funnel still stood. A few months ago, however, the benches inside the cabin, the deck flooring and even the rusty iron sheeting on the paddie wheels the rusty iron sheeting on the paddle wheels

the rusty iron sheeting on the paddie wheels were nearly all gone.

The project has been for several years past agitated by the newspapers and prominent citizens in the Canadian Pacific's terminal city to have the vessel protected in some way from these onslaughts and thus kept as a trophy of the country's progress. According to the above dispatch the agitation has proved futile, but fortunately many paintings and photographs of the old fossil are to be found along the coast.

FAITH DID NOT CURE.

A Coroner's Jury With the Customary Peculiar Notions

SANTA BARBARA, June 13 .- Fred Heim, a young man from Poland, died here yesterday morning very suddenly from typoid fever. He was a stranger, and was taken in by an itinerant faith-cure preacher named Elliott, and soon became too ill to know his wn mind. Neighbors, hearing of the case, nformed the chairman of the Board of supervisors, who sent an order to have the ung man removed to the County Hostal, where he learned that Elliott refused be moved, and so the county rays can let medicine for him. The faith-curist refused to administer the medicine, saying that he himself would cure the patient by faith and prayer. After Heim's death a Coroner's jury was summoned, but, after hearing the testimony, a majority favored a verdict of "death from natural causes," attaching no blancate Elliatt

the Members to Vote for Grover Cleveland on the First Ballot. The Pullman cars which are to bear the Democratic delegates to the Chicago convention arrived yesterday from the East, they being specially engaged by the Union Pacific. They will be decorated to-day and be in readiness by 9:30 o'clock on Wednes-day morning, when the delegation leaves. The special train will consist of four Pullman sleepers, a dining-car, a commissary car and a baggage-car. General Agent Hitchcock of the Union Pacific will accom-

pany the train and look after the guests. Considerable talk was indulged in among

Democratic politicians in regard to the statement that the delegation was not a unit for Cleveland. From a talk with a number of the delegation it was learned that there are 10 castron Cleveland men in the delegation who will vote for Cleveland first, last and all the time. The Fresno convention did not instruct the delegates, but four of the district conventions did instruct for Cleveland. It was further learned that at a meeting of the delegation held recently the entire delegation agreed to vote for Cleveland on the first ballot. Notwithstanding this it was admitted that there are a few on the delegation who after the first ballot may not stand by Grover. Those who are talked of as not being so earnest in Cleveland's fight are Delegates Frank Moffit, William English and Stevens. Several of the delegates, speaking yesterday of a statement alleged to have been made by Judge Archer of San Jose, now in New York, that any Democratic candidate but Cleveland could be elected, it was said that Judge Archer could not possibly have made such a statement, as he accepted the place of delegate from the Fifth Congressional District and the district instructed for Cleveland, a thing which Judge Archer did not oppose, though present at the time. ment that the delegation was not a unit

WHAT THE DOCTORS SAY.

They Agree Upon an Important Subject.

After a Most Careful Investigation They Completely Indorse One of the Greatest Discoveries of the Age.

Did you ever stop to think that the hardest worked people in the world are physicians? They are called out at all hours of the night; they have no day of rest; they are brought in contact with suffering constantly; there is a great strain upon them, especially if they have sympathetic natures. It is not surprising, therefore, that they feel distrustful of preparations or remedies seeking to cure without the aid of a physician—it is only Natural that they should feel so. But when prominent and well-known physicians voluntarily make such statements

physician—it is only Natural that they should feel so. But when prominent and well-known physicians voluntarily make such statements as follows, it is not only remarkable, but shows how certain they must be of the truth of what they say:

L. E. Quimby, M.D., Rangeley, Me.: "Although I is not considered etiquetie for a practicing physician to in any way aid in the introduction and sale of a proprietary medicine, still when we meet with an article of undoubted merit I believe it becomes our duty to not only use that article in our practice, but to introduce it to others and let them know what it will do. An old acquantance of mine had been a sufferer from bilious headache for 40 years. The attacks came regularly evary two weeks, and lasted, on the average, two days, she being confined to her bed during this time, suffering intensely. Hundreds of ooliars had been expended in medicines and doctors, but without any permanent relief. She was at last persuaded to try Warner's Safe Cure. Seven bottles cured her of this terrible disease, and during the past seven years she has not had a single attack of the old trouble. This after having been afflicted for 40 years.

"In October, 1884, I was called to attend the little son of David Moore of Madrid, Me. I found him suffering from general anasarea and bloated so that it was very hard for the little fellow even to breathe. By the heroic use of directles, catharties and absorbents I was able to temporarily relieve him. But, do all I could, the same condition would present itself as soon as the medicine was stopped. I had three of the old physicians of the county in consultation, but it did no good. The boy failed every day. I do not believe that under our treatment he would have lived two months. I gave him up, and, as a favor, requested the father to try Warner's Safe Cure. The first bottle relieved him more than all our medicines had done, and less than a dozen bottles permanently cured him, and he is to-day as tough and rugged as any boy in town." Tyre York. M.D., House

the kidneys. I take great pleasure in prescribing it in my practice."

J. D. A. Pohte, Buffalo, N. Y., declares: "Some time ago I had a patient suffering severely from Bright's disease, the urine being nearly one-half albumen with casts plentiful under the microscope. I treated her with all the remedice usually employed by medical men, but without any perceptible benefit. Having heard so much of Warners's Safe Cure and knowing that the regular prescriptions were useless from trial I recommended its use. From the very first bottle she commenced to mend and after she had taken some half-dozen bottles the albumen had disappeared, the urine resumed its normal color and the patient recovered entirely from her kidney trouble. This unexpected result gave me great confidence in the remedy, and putting aside my professional prejudice and with an eye single to my patients' welfare I have continued to prescribe it in many instances and with uniform success."

success."

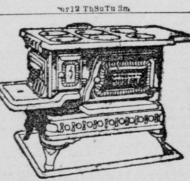

B. H. Mars, M.D., St. Louis, Mo.: "After using all remedies known to me as a regular graduate and practicing physician in one or two cases of kidney disease or Bright's disease, I worked like magic and restored the patients to health, which greatly astonished me. If the virtues of your remedy were known among doctors they would certainly prescribe it for kidney disease."

ease."

C. Onyette, M.D., Wyandotte, Kans.: "With Warner's Safe Cure I have cured several cases of Bright's disease and other very bad kidney disorders. I believe it far superior to any remedy known to the medical profession. It is one of my daily prescriptions and is of great service in every instance."

These are doctors of standing, dignity and conservatism. They make no statements but conservatism. They make no statements but such as they have ascertained to be true after the most careful investigation, and their statements prove beyond question the power and value of this great scientific preparation of which they speak.
