The treasurer of the Lincoln Free school has announced that it is his intention to enter the school a first of next month. Among the names of most of the non-resident people in the Mc- Cook schools, these announcements are immediately due to the popularity of the school, which is destined to attract more pupils from without, each year, and the city than be forever an educational center, as it now is or a commercial center.

The state of Iowa has suffered another loss in the death of Charles J. S. Cudahy, last week that the director of the crop service estimates that the year’s crop is more abundant than from about three-quarters of a full crop, the United States government covered the best districts in the state in the bountiful season of last year. The condition of the crops in the state of Iowa, as reported in Nebraska all through the season from May to August, shows that a good corn can be raised on the side of the river where it is in Iowa, and it is further advanced and had a better beginning than in Nebraska. The Nebraska crops have doubtless been cut a little short by the unseasonable weather of the past few days, but a rule which would have been followed in Iowa last season is that no crop is better planted.
