

The Appetite, the Income and the Clothes.

"Administer appetite and rag carpet income" is an expression used often by men of fastidious taste, whose earning capacity is not what they would like.

And yet such men can gratify the most ultra taste, in the matter of clothes, for HIGH ART CLOTHING is to measure made in everything but the price.

The HIGH ART system of cutting
drafts each pattern individually,
and completes each size in itself

The HIGH ART method does not permit the cutter to change trousers or sleeve lengths or any single dimension: for instance, stretching a 32 inch trouser pattern into a 34 inch inseam by adding 2 inches to the length. The result is a positive and exact size for every HIGH ART wearer, which insures a precise custom made fit.

THERE is something about our fall showing of HIGH ART SUITS which makes us enthusiastic to a degree---it may be the fetching styles, it may be the smart patterns, it may be the value, it may be the low prices, or it may be all four---that YOU can easily learn for yourself when you see them.
