The Chief Consulting and Examining

Our Physicians are Experts in the treatment of all diseases, including Tuberculosis, Consumption, Pleurisy, Pneumonia, etc., without the injurious use of drugs. Throat, Lung and Nasal Diseases treated by our new special method. Heart, Blood and Skin Diseases.

The physician's duty is to cure, not to kill. He should not advise a patient to take any medicine, unless he is sure that it will do good. Will Not Treat Incurable Diseases

Dr. DeLoach does not care to devote his time to the treatment of absolutely incurable diseases. If he can do any good for you he will tell you. He wishes to improve the lot of the victims of the True Demons, however. He does not consider a case incurable because other physicians have failed. It is in striking cases in just such cases that he placed his name as the average Specialist. If he can do any good for you he will tell you so and send you home with such advice as may be of value to you, as he will give a number of cards during his last visit.
