NEWEST NOTES OF SCIENCE.

India is producing more coal than all other British dependencies.

For the benefit of designers London has established a furniture museum.

Musical apparatus within the handle of a new fan plays as the fan is waved.

North Carolina has led the states in the production of mica for several years.

A French inventor is making gas pipe from paper, compressed, dried and varnished.

Hair combs with removable teeth that can be replaced when broken have been invented.

A railroad is projected to reach the top of Scotland's highest mountain, Ben Nevis.

A form of rubber stamp has been invented for marking initials of the owner on golf balls.

Ninety per cent of Italian boot and shoe factories are equipped with American machinery.

An English inventor has invented a perforated comb for spraying perfumes or lotions into the hair.

An automobile tire valve has been invented that acts as a safety valve to relieve excessive pressure.

So perfect is a German astronomical clock that its errors amount to only one second in more than 18 years.

An adjustably mounted lens has been invented to be attached to cameras to enlarge the images seen in the finders.

Berlin police are equipped with pocket telephones that can be connected to circuits installed throughout the city.

Defects in steel castings, even when the metal is quite thick, can be detected by recently improved X rays.

Sanitation methods introduced at Jerusalem by an American have materially reduced malaria and several other diseases.

The use of electricity for lighting is rapidly increasing in Japan, even the homes of the poorest classes in the cities having them.

Loops of wire normally separated by a spring handle, form a recently patented implement for handling hot cooking utensils.

That it saves both paper and patience is a Kansas inventor's claim for a device for holding sand paper that he has patented.

That he receives messages from as far away as Paris with the frame of an iron bed is the claim of a London wireless expert.

A waterproof blanket patented by a Massachusetts inventor can be used as an overcoat, cape, sleeping bag, tent or horse cover.

Copper and zinc dissolved in ammonia with a small proportion of benzol forms a new European wood preservative against moisture and heat.

A New York inventor's trunk is featured by a rack carrying several garment hangers, which can be extended for convenience in packing.

An Italian scientist contends that the signals which the nerves carry to the brain and from the brain to the muscles are chemical in nature.

The forthcoming revised edition of the United States Pharmacopeia will make use of the metric system of weights and measures.

A monument has been erected by public subscription to the memory of Schiaparelli, the distinguished astronomer, at his birthplace in Italy.

To keep shampoo water out of a person's ears a pair of protectors has been invented that are held in place by a resilient band under the chin.

The first case of rabies in about 14 years occurred recently in England, which enforces strict regulations for quarantining and muzzling dogs.

Final figures compiled by the Geological Survey show that 79,459,676 gross tons of anthracite coal were mined in the United States last year.

The Spanish government is encouraging sericulture by granting premiums for mulberry trees cultivated, cocoons produced and silk spun from cocoons.

A Philadelphia woman has invented playing cards on which portraits of women of notable achievement throughout the world replace the usual devices.

Of German invention for cripples is an artificial hand featured by an electro magnet to enable a wearer to handle tools and other metal articles.

Clothing for workmen fastened together with clips instead of seams has been invented so that a wearer can liberate himself when caught by machinery.

A car to carry two members of a rescue crew who propel it with bicycle gearing as it runs on the track of a mine railway has been invented in Europe.

A new electric washing machine for household use does all its work in a stationary laundry tub and eliminates all handling of water by its operator.
