THE constitution makes the capital of the state of Arizona at Phenix THE constitution makes the capital until changed by a | vote of the legilature and a majority vote of the people.

THE U.S. government robbed the poor man in 1873 by demonstizing his silver at enormous profits to the already rich boulholders. The same government stands aglass at the demand of the victims for the return of the value of their property.

ONE of the severest blows that can be struck will be the defeat of the constitution now being framed at Phenix. It will drive immigration away from us and the most progressive of our citizens will look elsewhere for the concentration of their energy.

In the course of debate on the Irrigation law, last Tuesday, Mark Smith said that in his county, in the great bulphur Valley, were immense farming lands, and that in our canvons "we can impound water sufficient to float the ships of the world, which now wastes and is lost forever in the berning sand,"

Ir the two great roll leal parties of Arizona will come together and at portion the . fficers for the state of Arizona to be voted for on a joint ticket wien the constitution is adopted we will be nesured of statebood. Democrats and republicans alike want statebood, that we can only pacify some of the kickers by a little sop we will be all right.

THE bill of rights of our future state recognizes the states right doctrine as a dead issue. Here is what it says: "The union of the states of the United Stotes of America ica bond of Govern ment supreme and indi-soluble; the power of the general government over any state or people to enforce obed- fighting. ience to the constitution and laws, and to punish any violation of the same, isupreme and indissoluble "

WHAT would be wrong about fooling congress a little bit in order to make a sure thing of getting into the union of states. It could be easily done. Let the constitutional convention provide for the election of state officers at the same time the constitution is submitted. We can adopt the constitution and elect one half democratic and the other half republican officers, as can be agreed upon by both parties. It could be easily arranged and under such an understanding the admission of Arizona would not be strongly opposed by the republican senate or president, as might be the case if Arizona showed a solid democratic front.

THE article in the constitution on

All public school exercises in this state st ', be conducted in the English language, and all teachers employed in the educational institutions under the control of the state shall

be citizens of the United States. It is such narrow minded policy as this which causes many people to stop and consider whether we are ready for statebood or not. In the first place, there is no university of note in the United States which does not give is patrons the privilege of acquiring the modern languages, and it is a recognized fact that natural born Ameri caus are never the teachers of foreign languages that one is who has been educated in those languages from infancy. There will be a time in the near future when it will become almost a necessity for the growing men of Arizona to sequire the Spani-h lan guage, to say that no teacher shall this afterno n for the construction of be employed unless a cirizen of the United States is simply -mall. Again this clause bars single women from teaching in the public school unless native born Americans. At the same time, men who are naturalized citizen can teach, for the definition of citizen is one who is born in the country or has become naturalize I, but as women do not become naturalized in the recognized meaning of that term, they are to be deburred from teaching in the public schools. The committee on education should have gone two steps further to complete their nonsense. They should have made Art. 1 read "No children not of native born American parentage shall have the privil-ge of a public school education." Then with the rider tacked to it known as the "Hospita' Bill" (enseted by the kid 15th) this offshoot of the committee on education would have been a m d-l of travesty on the intelligence of Arizonians,

A My-tery

How the human system ever recovers from the had effected the nau-conmedecines often literally poured into it for the suppositive relief of dyspensia, liver complaint, constitution heumatism and other ailments is a mystery. The mischi f done by bad medicines is scarcely less than that caused by disease. If they who are weak, bilious, dyspeptic, constituted or rheumatic, would oftener be guided oy the experience of invalids who have thoroughly tested Hostetter's Stomach Bitters, they would in every instance obtain the spee liest aid derivable from rational medication. This medicine is a searching and at the same time a thoroughly safe remedy, derived from vegetable rources, and possessing in consequence of its basis of our expirits, properties as a medicinal stimulant not to be found in the firty local bi ters and stimulants often re-orte ! to by the debilitated, dyspeptic and languid.

This d-claration expressing the uniform historic policy of the national densecratic party contained in its plat'orm of 1884 and 1888, we unreservedly reaffirm. We believe that all dollars coined by the United States should be of equal intrincie value and that all paper currency issued by the government should be redeemable in either gold or silver coin, at the option of of the secretary of the treasury. While we believe in the us of both gold and silver as money and in the full remonitization of the latter metal as an international agreement, we are firmly opposed to the free and unlimited coinage of silver by our government independent of the action of other nations and to the dangerous silver legi-lation enacted at the last session of congress."
