#### DO YOU GET UP

WITH A LAME BACK?

Kidney Trouble Makes You Miserable.

Almost everybody who reads the newspapers is sure to know of the won cures made by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy.

It is the great mediteenth century; dis-

covered after years of scientific research by Dr. Kilmer, the emi nent kidney and blad-der specialist, and is wonderfully successful in promptly curing lame back, kidney, bladder, uric acid trou-bles and Bright's Disease, which is the worst

form of kidney trouble.

Dr. Kilmer's Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble it will be found just the remedy you need. It has been tested in so many ways, in hospital work, in private practice, among the helpless too poor to pur-chase relief and has proved so successful in every case that a special arrangement has been made by which all readers of this paper who have not already tried it, may have a sample bottle sent free by mail, also a book telling more about Swamp-Root and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and send your address to

#### ICEBERGS.

They Are Useful as Well as Gram and Menacing.

When an iceberg is launched upor ts long journey its bottom parts are barnacled with sand, bowlders and other detritus gathered from the land surface over which it has made its tedious march to the sea. This burden is gradually cast off as it melts while drifting down along our continental

As a result of the deposits thus made through countless centuries, combined with the products of erosion carried seaward by the rivers, the sea bed for many miles off shore has been gradually filled up, creating those vast submerged plateaus, known as "banks," which extend from Labrador to the bay of Fundy and form the breeding grounds of innumerable shoals of cod, herring and other valuable food fishes. In this way the bergs have performed an economic service of incalculable value, laying the foundation for one of the world's most important productive industries and affording a means of livelihood to those hardy bands of "captains courageous" who each year reap the harvests of the sea.

The bergs serve a further economic purpose in that to their tempering influences are largely due the climatic conditions prevailing over a great part of the interior of North America .- Alfred Sidney Johnson in the World Today.

#### ABSENTMINDED.

Bunsen, the Great German Scientist.

In the autobiography of Sir Henry Roscoe there is a capital example of the absentmindedness of Bunsen, the great German scientist.

He had had his evening clothes put out that he might attend a card party to which he had been invited, but forgot all about it until the next morning, when his man pointed out that the evening clothes had not been worn. And then he remarked to himself, "I know what I'll do." That evening he put on his dress clothes, went to the lady's house at the appointed time and walked in as if it were the day upon which he had been invited. The hostess, much too polite to tell him that he had mistaken the evening and that the party had taken place on the previous night, sent to her friends asking them to come in to play a rubber again. They did so. In the course of the evening the conversation turned on absentmindedness, and Bunsen began to tell them what had happened to him a long time ago-how that he had for gotten an invitation and how he had made up his mind to go the next night and thus he told the party the whole

In the Drayton household it is said that the father of the family has a way of presenting alternatives to his children that never fails to bring them

into line. "I wish you would speak to Bobby," longer said Mrs. Drayton one night. "I've Press. told him to take his medicine and then jump into bed, and he won't do it. He just hops around and says he doesn't want to take the medicine and he

doesn't want to go to bed." Mr. Drayton stepped to the door o Bobby's room and stood there, tall, grave and impressive.

"Bobby," he said firmly, "If you don't take your medicine at once and then jump into bed you will be put to bed, do you hear me, put to bed, without having your medicine at all."

Upon which Bobby, alarmed and confused, swallowed his allotted portion and meekly retired for the night.-Youth's Companion.

"Scouring the Land." I have just been examining an old book containing the accounts of the charity estate of West Haddon, embracing the years 1773-1850. Under date Aug. 17, 1776, is the following

entry:
"Paid Richard Worster seven days" work, cutting thorns and scowering and stoping of gaps, 10s. 6d." The term "scouring the ditch" is used on Jan. 8, 1781, and appears many times after this date, the last instance being on April 28, 1820.-Lon-

#### OUR BRAINS ARE DOUBLE.

But Only One of Them is Used

Man has a pair of brains just as he has a pair of eyes and a pair of ears, declares Dr. William Hanna Thomson in Everybody's. But, asserts Dr. omson, only one of our two brains

is used to think with. He continues:

"When we come into this world we have a pair of quite thoughtless brains and nothing more. To become intelliments, not one of which does a human Thus no one can become a skilled vio-

Mr. Lincoln replied that he had been told this frequently before and that when it was first mentioned to him he was reminded of a farmer in Illinois who determined to try his own hand at blasting. After successfully boring and filling in with powder he failed in his effort to make the powder go off, and after discussing the cause with a looker on and failing to detect anything wrong in the powder the farmer suddenly came to the conclusion that it would not go off because it had been shot before. Needed a Cloudburst.

Staying at an inn in Scotland, shooting party found their sport much interfered with by rain. Still, wet or fine, the old fashioned baremeter that hung in the hall persistently pointed to "set fair." At length one of the party drew the landlord's attention to the glass, saying, "Don't you think, now, Dugald, there's something the matter with your glass?" "No, sir," replied Dugald, with dignity, "she's a gude glass and a powerful glass, but she's no' moved wi' trifles."

A learned correspondent writes: "I was examining a witness, an elderly woman, the other day. On my inquiring her name she said it was Mrs. Bardell and that she came from Gravesend. I asked, 'Did you know Charles Dickens? She replied, 'Do you mean the undertaker? Such is fame."-London News.

The Spanish Duchess. A duchess enters a shop. Do you imagine she will be more courteously received than a little milliner? Not at all, for both are instantly made at home and treated to the hidalgo's finest manner. But she will never be the less a duchess because she and the shopkeeper are on the best of terms. Her unconsciousness of her rank in everyday relations, which would stupefy an English duchess, comes from the fact that she belongs to a prouder race. Had she a mind to sport her coronet her decorative dignity. To them it would simply mean an underbred and foolish exhibition, for impertinence the Spaniards will tolerate. - Black-

Fujiyama, the sacred mountain of Japan, is undoubtedly the most beautiful mountain in the world. I have seen many beautiful paks, and have seen pictures of many others, but never has there appeared before my eyes such wendrous beauty as that of this mountain rising for two miles directly up from the sea, with its green slopes gradually changing until they are capped by a point covered with snow. The sides are perfectly symetrical and the top appears to be a sharp point piercing the sky. As I saw it for the first time this morning from the balcony of the hotel, its top reddened by the sun just rising, I no longer wondered that this semi-civilized people worshipped it as something super- At New Hampden
