Miss Woods Resigns

Miss Pauline Woods' resignation will take effect the first of March, and the unexpired term will be filled by Miss Marguerite Drumm, who is now back at her duties in the recorder's office, having been absent from Holbrook for several months.

Miss Woods was elected county recorder by a good majority almost two years ago. She has very efficiently filled the position to which she was elected. She is exceedingly popular in Holbrook society and will be missed. She resigns to take a greatly needed rest which she will seek in the pleasant climate of California.

"The Land of Stalking Death"

"Crouching by herself in a corner, a little seven-year old girl was cracking something between two stones," says Melville Charter in an article. "The Land of Stalking Death," in the National Geographical Magazine (November, 1919), describing conditions in Armenia. "I looked and found the child was eating the marrow from a bone."

"Where did she get it?" I asked the interpreter who accompanied me.

"Yonder in the grave yard," he replied, after questioning the girl.

The Near East is the only hope of thousands of starving children in the Near East. Arizona has been called upon to provide shelter, clothing and food for 1,000 orphans. The campaign is now on. Subscriptions are now being received by the state Headquarters, Near East Relief, Phoenix National Bank Building, Phoenix.

Proper Food for the Child

Proper feeding is one of the chief factors in health, and it is for the mother to realize her responsibility in proper feeding to insure the health of the child. The kind of food a child has today determines to a considerable extent the fitness of the future citizen. Good food habits should

start today for tomorrow may be too late.

Meals should be served regularly, this is of a paramount importance. Do not allow piecing between meals. If the child gets very hungry before the next meal, a piece of bread and butter will suffice. Never give candy, cake, nuts or cookies. Children require at least four glasses of water between meals. Water will often satisfy the craving which many mistake for hunger.

New foods should be introduced into the diet gradually, and by giving small amounts at the time. One must be patient but firm in teaching the child foods that are good for them. It is essential that the child have plenty of time for his meals. He should not eat his breakfast while running to school but should have time for a properly served breakfast. To have good digestion one must eat slowly and masticate his food thoroughly.

A child should never be allowed to come to the table with dirty hands and face. Dirt is dangerous. Cleanliness should be insisted upon, he should sit down to a clean table, and eat in an orderly manner, it is this early training that will mean much in later years.

Mrs. Amy Christal returned Thursday from Los Angeles where she has been visiting the past month.

E. J. Harbin, of Winslow, was accompanied by R. L. Keith, Monday in taking a view of the oil situation here. Mr. Harbin says that things in Winslow are progressing in the oil game satisfactorily, but that the bad and muddy roads of the past month have considerably interfered with developments.

Jack Coleman went to Kansas City this week. He was accompanied by his parents, Mr. and Mrs. C. C. Coleman, who have been spending several days visiting with their son. The elder Coleman has had charge of the Harvey eating station at Ash Fork for some time past.

Miss Nydia Acker, Home demonstration Agent from Tucson, will give a pressure cooker demonstration at the Methodist church, Wednesday afternoon, February 18th, 2:30 p. m. All ladies interested in this modern home convenience are cordially invited.

"FLU."

We had a telephone call from Flagstaff Thursday inquiring about the influenza epidemic in our city, stating that it was reported we had over two hundred school children ill and five teachers, besides numerous other citizens.

We can not understand where such reports emanate from, as they are entirely false, and for the benefit of our neighboring towns will state that we have about one hundred cases of the "flu", all of which are in a very mild form and not a single death to date. The situation is well under control and the doctors state that they expect no serious effects whatever, and that the nice weather and sunshine which we are now enjoying will completely check the spread of the disease.

HOME DEMONSTRATION AGENT HERE

Miss Nydia Acker, of the University Extension Department, Tucson, is in Winslow to install the hot school lunch in the Southside school. Miss Acker established the school lunch work in the school of Pertleville, a Mexican community near Douglas, with most gratifying results. There was a great deal of malnutrition among the children in that community but by the end of the school term the mental and physical condition of the children was noticeably improved.

She is also prepared to give demonstrations to the women in the use of the pressure cooker, a fuel, time and labor saving device, which every woman should be interested in. She has an exhibit of reconstructed garments that would be of interest to the ladies in the community.

Winslow Mail, \$2.00 a year.
