

AUTOMOBILE CLUB OF ARIZONA JOINS U. S. ASSOCIATION

The Automobile Club of Arizona has taken the first step toward complete affiliation with the National Motorist association, a union of 500,000 automobile owners located in all parts of the United States. The object of the association of automobile clubs is mutual benefit, protection and assistance to touring members when out of their own states.

Charles Kimberlin, manager of the Arizona club, has received a contract from the Automobile Club of Chicago, one of the largest organizations of its kind in the United States. More than forty automobile clubs are now members of this nation-wide organization.

The reciprocal contracts between the various automobile clubs composing the association insure the touring member the same treatment when in the jurisdiction of any contracting club as local members are entitled to. This means better garage service, courteous treatment at hotels, cafes, etc., that belong to the association, by showing membership card.

The advertising value to Arizona will be great, as Arizona maps and descriptive matter will be supplied each club of the organization for distribution. Manager Kimberlin believes that the theft department of this great organization will do much to reduce the stolen car problem, as a large and well financed force of detectives will be maintained to trace stolen cars and see that thieves are properly punished. The organization also will work for national control of automobile licenses in an effort to have the same charges and regulations in force in each of the forty-eight states and the District of Columbia. The national organization will also work for a uniform system of highway marking.

PLAN FOR DEFENSE DAY OBSERVANCE ON JULY FOURTH

With central and local committees for Arizona announced, plans for the observance of the second national defense test on July 4 are actively under way.

Capt. J. L. B. Alexander, of Phoenix, Spanish war veteran and state chairman for the first national defense test successfully held last year, has again been named to head the central committee for Arizona, having charge of the plans for the defense test. Other members of the central committee are E. S. Stallcup, state commander of the American Legion, and Major Charles H. Rutherford.

The military section of the state committee is composed of Charles W. Harris, adjutant general of Arizona; Capt. E. J. Boyer, instructor of the Arizona National Guard, and Capt. George F. McDonald, executive officer of the organized reserves.

The mayor of each city and town in Arizona has been designated by Governor Hunt to be chairman of the local committee in his community, and will appoint his own committee for carrying out the local plans for the defense test program, which, in addition to acquainting the American people with their national defense policies and obligations and demonstrating the plans for the organization of the army in the event of a national emergency, will appropriately add emphasis to the celebration of Independence, when congress first pledged the man power and resources of the country for national defense.

Legion Asks U. S. to Maintain Big Navy

The national executive committee of the American Legion decided at its meeting at Indianapolis early this week to urge the United States government to make provision for maintaining the 5-5-3 naval ratio fixed by the Washington conference. The committee also directed James A. Drain, national commander to "bring to the attention of the comptroller of the budget that it is unwise not to provide for an increase in the enlisted personnel of the navy of at least 4,000 men."

The naval affairs committee of the legion, through its chairman, E. E. Spafford, of New York, in a report declared that recent maneuvers disclosed the necessity for further provision in the federal budget for fortification of the Hawaiian Islands and for work on Pearl Harbor.

Comic Fishing Law Is Passed in Utah

The last Utah legislature passed an act designed to prevent fishermen from using more than two hooks on a line. The new volume of statutes, however, reads as follows:

"It shall be unlawful not to use more than two hooks on any one line when angling for game fish." Members of sportsmen's organizations are speculating on what an or can not be done about it. An error occurred in printing.

Quarantine Station Will Open July 1 at Yuma

Arizona will open its first quarantine station for the inspection of its tourists at Yuma July 1, designed to prevent transmission of pest pests into this state from California, it is announced by local authorities. The station will be located at the stern end of the bridge spanning the Colorado river.

Winter Fruits

THE orange is especially prized during the winter months, when it is at its best and most plentiful and good flavored.

The winter diet, being rich and heavy, needs such fruit to keep the body in good condition. All citrus fruits contain fruit salts and acids which are most beneficial to health.

A pint of orange juice contains almost the same number of food units as three-quarters of a pint of milk. Orange juice is quickly assimilated and because of its action on the bowels, is one of the finest digestive regulators.

Its beautiful color makes the orange particularly enjoyed in winter, when color in foods is most appreciated.

As a garnish the orange has wide possibilities. Baskets, cups, flowers, confections, may be prepared, the fruit preserved and served as a confection, or as receptacles for salads or jellies.

A sherbet is easily prepared using citrus fruit, orange or lemon juice, sugar sirup and water, or if a richer sherbet is desired, thin cream or rich milk in place of the water. Serve in orange cups with roast meats or fowl. Candies of various kinds flavored with these fruit juices are both wholesome and delicious. Plain fondant, flavored with lemon or orange juice and made into patties like the wintergreen or peppermint, is well liked.

Turkish delight prepared with gelatin, sugar sirup and fruit juices, cooled in a flat dish and cut into oblongs, then rolled in powdered sugar is another very popular confection.

To prepare the sirup for glazed fruits take two cupfuls of sugar, one cupful of boiling water, one-third of a teaspoonful of cream of tartar. Boil until the sirup begins to color light brown, or to 310 degrees F., then dip each piece quickly, keeping the sirup over hot water. (© 1925, Western Newspaper Union.)

Fruit Crops Will Be Smaller Than 1924

Only fair crops of apples, peaches and pears are now expected in the United States this year, department of agriculture crop officials declared this week. Frosts in late May reduced prospects in many scattered sections, particularly in some of the central states, Virginia, Michigan and portions of New York.

The condition of apples on June 1 was nearly 10 per cent below the usual average on that date. The northwestern states expect more apples than were picked last year, but for the country as a whole the crop seems likely to be lighter, although much depends on the rainfall during the next few months.

Peach production shows a large increase in California, where most of the crop is canned or dried, but in practically all other important states the crop is expected to be less than 7,000,000 bushels, compared with 8,333,000 bushels last year.

The pear crop also is reported only fair this year, California alone among the important producing states expecting materially larger crop than in the preceding season.

ORDINANCE No. 139.

AN ORDINANCE DECLARING PUBLIC NUISANCES, PROVIDING FOR THE ABATEMENT THEREOF, AND IMPOSING PENALTIES FOR THE CREATION, CONTINUANCE OR SUFFERING OF NUISANCES TO EXIST.

Be it ordained by the mayor and common council of the town of Winslow as follows:

Section 1. Anything which is injurious to health or indecent or offensive to the senses, or which obstructs the free use of property, or which interferes with the comfortable enjoyment of life or property by an entire community or neighborhood, or by any considerable number of persons, or which unlawfully obstructs the free passage or use in a customary manner of any water course, public place, street, sidewalk, alley or highway in the town of Winslow, is a public nuisance.

Sec. 2. No trash shall be burned within the limits of the town of Winslow unless it is placed in an incinerator.

Sec. 3. No merry-go-round nor carnival shall be allowed to operate within the limits of the town of Winslow north of First street.

Sec. 4. No owner, tenant or occupant of any premises within the city of Winslow shall hereafter erect or construct thereon any

barn, stable or corral, or hereafter maintain any barn, stable or corral, or keep any cow, sheep, hog, goat or other meat animal within the town of Winslow, whether public or private, unless and until the said premises so used for the keeping of such animals and live stock shall be securely screened and walled to shut off from the view and to prevent persons of the town from being annoyed by the view of or odor arising from such premises as occupied and used for the keeping of such animals and live stock.

(2) It shall be the duty of every person owning, controlling, operating and having in charge any public or private corral, stable, barn or place where horses, mules, asses, cattle, sheep, goats, swine, poultry or other live stock are kept, to have and maintain at all times upon the premises in or adjacent to such corral, stable, barn or place a receptacle of sufficient dimensions, which shall be fly tight, for the purpose of containing the droppings of manure from such stock, which said receptacle shall have a top or lid so arranged and maintained as to be fly tight and exclude therefrom all flies; and such owner, tenant or occupant shall promptly deposit therein all droppings from such stock, and shall keep the lid thereof closed (except when necessarily open for the purpose of depositing therein or removing therefrom) in such manner as to prevent the ingress and egress of flies thereto and therefrom, and every such owner, tenant or occupant within the town of Winslow shall cause the contents of such receptacles to be removed from the premises at least once a week, and often if required by the town health

officer; and no such manure shall be transported over or along any public street or way within the town of Winslow except in a tight vehicle, which, if not closed, must be covered with canvas or other suitable material, so as to prevent the falling of the manure therefrom and the access of flies thereto.

(3) No owner, tenant or occupant of any premises within the town of Winslow shall suffer, permit or have upon such premises any privy, cesspool, vault, pit or like place, animal manure, except when used on garden or lawn, garbage, trash, litter, rags, or other thing in which flies may breed or multiply, or which may be obnoxious to the human senses, unless the same shall be protected as to prevent the attraction, breeding and multiplying of flies.

(4) Every owner, tenant or occupant of any premises within the town of Winslow in or upon which are kept any horses, mules, asses, cattle, sheep, goats, swine, poultry or other live stock or in or upon which there is any privy, vault, cesspool, or a place which is or may become noxious or offensive to the senses, shall at all times keep and maintain such premises so covered, enclosed, protected, cleaned, drained and disinfected that no offensive or noxious gases or odors may or shall arise therefrom, and any such premises which are not at all times kept and main-

tained so covered, closed, protected, cleaned, drained and disinfected as to prevent any and all offensive and noxious gases and odors arising therefrom, or which are allowed or suffered to become a breeding place for flies and insects or to become offensive or obnoxious to the residents in the immediate neighborhood, are hereby declared to be nuisances and subject to summary abatement, and in addition to such abatement, the person or persons in charge or control thereof, or responsible therefor shall be guilty of a misdemeanor and punishable as hereafter provided.

Sec. 5. Every person, firm, association or corporation who shall violate, cause or allow to be violated any of the provisions of this ordinance shall be guilty of a mis-

demeanor, and upon conviction thereof shall be punished by a fine not to exceed \$300.00 nor more than ninety days in jail or by both such fine and imprisonment.

Sec. 6. This ordinance shall take effect and be in force from and after its passage as required by law.

Passed and adopted by the mayor and common council of the town of Winslow this second day of June, 1925.

(SEAL) FRED B. DOUGLAS, Mayor.

If Gasoline Sold by the Mile—

There wouldn't be enough good gasoline to go around—and the poor gasolines couldn't sell at half their present prices.

Mileage is the quality test of a gasoline. Not only "miles per gallon," but "miles per motor." For it is the motor that pays when inferior fuel is used.

Think then of gasoline in terms of good clean miles. On this basis, your choice will fall naturally upon Union Gasoline.

Union Gasoline is a quality product. And it is non-detonating—which means that it does not explode so as to strike the pistons a sudden, crashing blow.

The power-impulses from Union Gasoline con-

tinue throughout the entire length of the piston's stroke.

This permits the motor to start quickly—to accelerate with a swift, vibrationless pick-up—and to attain an even, gliding speed.

If a better gasoline were possible it would be made by the Union Oil Company, and sold wherever you see the sign "Union Gasoline." At Union Oil service stations and independent dealers of the first class everywhere.
