

## For Little Misses

BY JULIA BOTTOMLEY.

**N**O prettier millinery can be found for the little miss than is pictured here. Children's hats are more elaborate than for many seasons, but the choice of materials saves them from losing their childishness. Simple laces, light and transparent straws, small flowers and soft lightweight ribbons, with high luster, take away every suggestion of grown-up styles and leave us and the little ladies equally delighted with the season's offerings.

The first hat shown is the familiar corday model with puffed crown of lacy braid and brim facing of the same. The upper brim is covered with two rows of side plaited chiffon or mull edged with lace. A collar of ribbon is finished with a rosette at the side, made of two ruffles of the ribbon. Small rose buds and foliage finish the trimming. Children from six to sixteen years can wear a design of this kind.

The odd little hat in Fig. 2 is designed for a little youthful wearer. It is made on a wire frame of a lacy silk braid. The side crown is made of ribbon shirred at each edge on a wire. The brim is finished with the braid laid in boxplots. A childish wreath of small daisies and forget-me-nots, with bows of ribbon at each side, trim the hat. A single tie (which may be omitted) falls from the left side and is fastened to the shoulder with a little collar pin under a spray of flowers.

### DAINTY SCARFS FOR SUMMER

Of All Kinds and Descriptions, and Generally More Elaborate Than Ever.

Marabout and ostrich scarfs are more elaborate than ever.

There is no end to the possibilities that lie within the fluffiness of the feathers, combined with folds or shirings of chiffon.

An edging of black and white marabout completes a bit of feminine daintiness that would add charm to any costume.

A fancy bow of cerise velvet combined with chiffon in the same shade has long ends that would be especially effective on a white frock.

The most popular scarfs have bodies of shirred chiffon with edgings of marabout that either match or are in striking contrast.

They are so simple in design that any woman even passably clever with the needle can fashion one in an afternoon.

A muff to match is a smart acquisition and the set looks well with an evening coat or for theater wear.

### MADE UP IN DARK BLUE

Charming costume in dark blue striped silk with rovers and cuffs in plain silk. The skirt is high-waisted, and with it is worn a blouse in blue nylon.

## Backache Means Dying Kidneys

How You May Cure Yourself Quickly and Thoroughly.

Every man and woman should know that backache is usually a well-defined symptom of advancing kidney disease which may end fatally unless treated in time; that rheumatism and bladder trouble are caused from nothing more nor less than kidneys that do not filter the poison from the blood.

Once they are made to work properly, these diseases should quickly disappear. This is done by the new treatment, Dr. Derby's Kidney Pills.

We urge everyone who has pain in the small of the back, profuse or scanty urination, pains in the bladder, cloudy or foul urine, not to fail to get a package today of Dr. Derby's Kidney Pills, and drop all other kidney treatments.

Dr. Derby's Kidney Pills are now sold at all drug stores—25 and 50 cents, or direct from Derby Medicine Co., Eaton Rapids, Mich. If you would like to try them first, ask your druggist for a free sample package. Then buy a package; you will not regret it.

### Some Antique Mugs.

The college collector of antiques stopped off at Bacon Ridge.

"Good day, sir," he said, addressing the postmaster. "I am collecting old-fashioned articles and would like to know if I could find anything like that in his hamlet. Say antique mugs, for instance."

Uncle Jason stroked his chin whiskers.

"Antique mugs! By hek, I know the very place where there be two of them now."

"You do? Here's a good cigar. Now where can I find these antique mugs?"

"Why, down on Main street, in Hiram Sprucey's shop. Grandad Wheatley and Pap Simmons are in there getting shaved, and by hek, when it comes to antique mugs, I reckon thars' be the oldest in the country, stranger."

### Age of Oysters.

Oysters grow only during the summer and especially during the long, warm summers at that, and are scarcely big enough for the mouth before the third year. It is easy after looking over a bunch of shells to tell how old an oyster is. A summer hump and the winter sink come across the shell every year, but after the seventh or tenth year full growth comes; then, by looking at the sinks between the humps it is hard to tell anything more about Miss Oyster's age. Oysters live to be 20 years old.

### Fine Scheme.

Wife—Please match this piece of silk for me before you come home.

Husband—At the counter where the sweet little blonde works? The one with the soulful eyes and—

Wife—No. You're too tired to shop for me when your day's work is done, dear. On second thought, I won't bother you.

### Made It Necessary.

"Horace Greeley invented the typewriter."

"Where did you get that idea?"

"Well, that isn't exactly what I mean, but his handwriting was probably more responsible for it than any other one thing."

### Too Much Like Work.

"The boss's son is kicking."

"Why?"

"Says he's overworked. All he used to do was tear the pages off the office calendars once a month. Now he has to wind the eight-day clock, too."

If you want a thing well done, do it yourself.—Wellington.

## SETTING A HIGH STANDARD

Child's Idea of Goodness Set Forth in Perfect Faith, Without Irreverence.

All things are relative, and to the child, gazing at life and its wonders with eyes as yet undimmed by sophistication or sorrow, nothing is impossible, nothing unspeakable, nothing too sacred to be discussed or too difficult to be attempted. Not irreverence nor impertinence, but innocence prompts such speeches as that recorded of the child of a popular journalist by his devoted paternal grandmother.

"Grandma," said the little boy, delightedly addressing her, "do you know what's going to happen? Papa says that if we're real, real good, he'll take us to the circus!"

"That's nice," smiled the young-hearted adult between whom and the eager youngling no hint of age separation mars perfect comradeship. "How good do we have to be?"

The embryo man, after a moment of silent consideration: "Oh, as good as God, I guess!"

### Socially Launched.

In his native town Jimmy had always been most popular with young and old, but when he was sent away to boarding school, he was for a time too homesick to make friends. His first letter was little more than a wall.

"I'm way behind the other boys in everything," he wrote, dolefully. "I ain't only studies, but it's gymnasium and banjos and everything. I don't believe they'll ever have much use for me."

But the second letter, written after a week in the new school, was quite different in tone.

"I'm all right," he wrote to his mother. "The boys say they'll teach me all they know, for they're proud to have me here. I can stretch my mouth half an inch wider than any other boy in school, and my feet are the longest by a full inch. So you needn't worry about me any more."—Youth's Companion.

### Had His Troubles.

"Michael Dolan, an' is it yourself?"

"Yes; sure it is."

"Well, ye know that blitherin' spalpeen, Widdy Castigan's second husband?"

"That I do."

"He bet me a bob to a pint of whiskey I couldn't swally an egg without breakin' the shell uv it."

"An' ye did it?"

"I did."

"Then phwat's allin' ye?"

"It's doon there," laying his hand on the lower part of his waist coat, "if I jump about I'll break it, and cut me stomach wid the shell, an' if I kape quiet it'll hatch and I'll have a Shanghai rooster scratchin' me inside."

### Well Mated.

Thus the inquisitive boarder:

"What has become of the old-fashioned woman who used to call a wedding reception an infare?"

Response by the white-haired boarder:

"I think she married the old-fashioned man who used to crack his knuckles regularly twice a day."

### Ambiguous.

Obliging Shopman (to lady who has purchased a pound of butter)—Shall I send it for you, madam?

Lady—No, thank you. It won't be too heavy for me.

Obliging Shopman—Oh, no, madam. I'll make it as light as I possibly can.—Punch.

### The Riddle.

The Sphinx propounded a puzzle.

"Why does it always rain the day you move?" she asked.

Herewith the ancients gave it up.

A woman's idea of a brave man is one who isn't afraid to go into a dark closet in which there may be a mouse.

BETTER FOR MEN, WOMEN AND CHILDREN THAN CASTOR OIL, SALTS, OR PILLS, AS IT SWEETENS AND CLEANSSES THE SYSTEM MORE EFFICIENTLY AND IS FAR MORE PLEASANT TO TAKE.

### LOST FAITH IN WHITE MAN

Eskimo Tested Efficacy of Telephone Scheme, and Realized He Had Been Deceived.

An interesting story is told regarding the efforts of an Eskimo to construct a telephone line. The Eskimo came into possession of a piece of wire of considerable length and never having seen wire before he asked Professor McMillan of the Peary north pole expedition what it was and what it was for. He was told that the white man strung it on poles stuck in the ground and a voice talking to an instrument at one end could be heard at the other end. After some search the next morning the Eskimo was found to be engaged in telephone construction work of his own. He stuck some sticks in the ground and hung his wire on them. He held one end of the wire to his mouth and talked to it at the top of his voice. Then he ran as fast as he could to the other end and held the wire to his ear with the expectation of hearing his own words repeated.

When he failed to hear any sounds the expression on his face revealed his opinion of his white friend.

### To the Childish Mind.

Dorothy Ullman of E. Eighty-fourth street, is a very literal young person. To her mother's definition of the All-Seeing Eye she returned a question as to the size of the eye.

"Can God see everything?" she continued.

"Yes, dear, he can see everything, at all times."

That afternoon Dorothy escorted her mother down town. Before an optician's display she stopped. Then, "Mother," she asked, pointing to the big winking eye in the window "Is God's eye as big as this?"—Cleveland Leader.

### Very Much Attached.

Swenson—Why do you always hear a ship referred to as "she"?

Benson—I guess it is because she sometimes becomes very much attached to a buoy.

## Can't Get Away From It

Is it possible to nourish, strengthen and Re-build the Brain by Food?

Every man who thinks uses up part of the brain each day. Why don't it all disappear and leave an empty skull in say a month of brain work? Because the man rebuilds each day.

If he builds a little less than he destroys, brain fog and nervous prostration result sure. If he builds back a little more each day, the brain grows stronger and more capable. That also is sure. Where does man get the material to rebuild his brain? Is it from air, sky or the ice of the Arctic sea? When you come to think about it, the rebuilding material must be in the food and drink.

That also is sure.

Are the brain rebuilding materials found in all food? In a good variety but not in suitable proportion in all.

To illustrate: we know bones are made largely of lime and magnesia taken from food; therefore to make healthy bone structure we must have food containing these things. We would hardly feed only sugar and fat to make healthy bone structure in a growing child.

Likewise if we would feed in a skillful manner to insure getting what the brain requires for strength and rebuilding, we must first know what the brain is composed of and then select some article or articles (there are more than one) that contain these elements.

Analysis of brain by an unquestionable authority, Geoghegan, shows of Mineral Salts, Phosphoric Acid and Potash combined (Phosphate of Potash) 2.91 per cent of the total, 5.33 of all mineral salts.

This is over one-half.

Beaunis, another authority, shows "Phos-

phoric Acid combined" and Potash 73.44 per cent from a total of 101.07.

Considerable more than one-half of Phosphate of Potash.

Analysis of Grape-Nuts shows: Potassium and Phosphorus (which join and make Phosphate of Potash) is considerable more than one-half of all the mineral salts in the food.

Dr. Geo. W. Carey, an authority on the constituent elements of the body, says: "The gray matter of the brain is controlled entirely by the inorganic cell-salt, Potassium Phosphate (Phosphate of Potash). This salt unites with albumen and by the addition of oxygen creates nerve fluid or the gray matter of the brain. Of course, there is a trace of other salts and other organic matter in nerve fluid, but Potassium Phosphate is the chief factor and has the power within itself to attract, by its own law of affinity, all things needed to manufacture the elixir of life."

Further on he says: "The beginning and end of the matter is to supply the lacking principle, and in molecular form, exactly as nature furnishes it in vegetables, fruits and grain. To supply deficiencies—this is the only law of cure."

The natural conclusion is that if Phosphate of Potash is the needed mineral element in brain and you use food which does not contain it, you have brain fog because its daily loss is not supplied.

On the contrary, if you eat food known to be rich in this element, you place before the life forces that which nature demands for brain-building.

Mind does not work well on a brain that is broken down by lack of nourishment.

A peaceful and evenly poised mind is necessary to good digestion.

Worry, anxiety, fear, hate, etc., etc., directly interfere with or stop the flow of Pyloric, the digestive juice of the mouth, and also interfere with the flow of the digestive juices of stomach and pancreas.

Therefore, the mental state of the individual has much to do (more than suspected) with digestion.
