Chippewa county has hit on a scheme to keep its offenders employed will direct the operations.

FLOWERS IN THE HOUSEHOLD

Simple Methods That Will Keep Them Alive, Fragrant, and a Pleasure for Many Days.

To make flowers last a week or more, four things are necessary. First, do not try to arrange them the moment you get them, but put them in a pail of water for a few hours, so that every stem will be under water up to the flower. Second, cleanse the vase thoroughly before putting in the flow ers and change the water every day. Third, the cooler you keep the flowers the longer they will last. If you are too busy in the morning to enjoy them or have to go out for the afternoon, do not leave them in the living rom, for they are not used to such a temperature. Every night put the vase in a cool place, or better still, plunge the stems up to the flowers in a pail of water. Fourth, cut about a quarter of an inch off each stem in the morning. It is more trouble to do this under water, but it pays. If you cut the stems in the ordinary way air bubbles get into the stems and impede the tak ing in of water.-Delineator.

AWFUL.

"I don't wemember what I ate, but had an awful dweam."

"What was it, old chap?" "I dweamed my valet went away without lacing my shoes,"
