President Hymans resented the imputation but the Canadian delegate kept shouting his protests despite the sharp pounding of the president's gavel. Japan suffered her first defeat when the Japanese delegation at-tempted to obtain a rule that half of the chairmen of committee be chosen from outside of Europe. The pro-posal was rejected.

MONROE DOCTRINE IS RESPECTED BY LEAGUE

GENEVA, Nov. 16. (By the Associated Press.)—All danger that the assembly of the league of nations may encroach upon the Monroe doc-irine by considering American questions in the absence of the United States, has been averted by the withdrawal of a request by Bollvia and Peru for revision of treaties with Chile. Their requests were withdrawn yesterday, it having been Bolivia's purpose to gain access to the sea, and Peru's to secure recon-tideration of the vexing Tacna-

It is not expected that any other American questions with dangerous bossibilities will come before the present session of the assembly. Six committees, charged with dealing with all questions on the agenda, began work today. Each committee has 41 members, all the nations have

ing delegates at the meeting here being represented.

It is reported that South Ameri-can delegates have agreed the league of nations should do all it can to get the United States to become a member nation.

Argentina is regarded as a strong

candidate for representation on the council of the league, the four elec-tive members of which will | be chosen by the assembly after receiving the report of the committee on general organization,

WASHINGTON, Nov. 16. (By the Associated Press.)—Consideration of the Tacna-Arica dispute between Chile, Peru and Bolivia, by the ons would not be re garded by the American government as an encroachment of the league of the Mønroe doctrine, according to state department officials. When state department officials. When the announcement was made that the question had been referred to the league considerable satisfaction was expressed by administration officers, as a settlement of this long-standing controversy has been earnestly desired by the United States. It has been pointed out at the

state department that settlement by such a means would not be without precedent as the king of England and the king of Spain have acted as arbiters in South American boun-dary questions in the past.

The administration's attitude with respect to the Monroe doctrine has been based upon the literal interpretation providing against any terri-torial aggression in South America.

ning of our ships we have had to train thousands of men. "Of course, in an organization of this magnitude, you will find here and there evidences of wrongdoing, and now and then you will uncover a systematic effort to defraud. It was necessary for the shipping board to employ men whose sole responsibility was the uncovering of wrongdoing and these men were charged with a heavy responsibility. The men who we depend upon to be checks upon those who might be tempted to do wrong, bear a heavy responsibility if they failed us, but in an organization spending more than \$3,000,000,000 where as the largest steamship operator in the world, millions of dol lars are expended from day to day it would be impossible to prevent all frongdoing or to do business without suffering financial losses

Improvement in Other Mar kets Fails to Have Much Effect on Cotton.

Tuesday Afternoon, Nov. 16. Although there was a better mar-et for foreign exchange and higher evels were reached in grains and stocks, cotton displayed little strength during the session today Cables did not bring any special en-couragement, but on the other hand they told of further liberal cancellations at Manchester. In this country reports of further short time and of reductions in finished goods, especially yarns in the Philadelphia mar-ket, seemed to stimulate bearish con-fidence. Some absorption of offerings by trade interests gave a modi-cum of strength for a time, but ag gressive support was lacking and it did not take much pressure to dis-sipate the moderate gains made early

the day.

The weather map showed that the stern part of the belt had rains ver night and more were in prosect, which will lower grade of the unpicked part of the crop and in-terefere with picking, while it was very cold in the western belt. Opening prices were sightly to the bad, but pretty good buying came from trade interests during a period of limited selling the result being an upturn of about half a cent, December going up to 18,65c from 18,15c. There was little snap in the spot department and advices told of limited business, so the market reacted and by midafternoon had dropped back to around opening levels, with the distant positions off more than the near, which seemed to reflect little belief in general conditions getting better soon.

Some wires said the basis for spots in the eastern belt was easier, while other sections told of small demand and business restricted.

NEW YORK COTTON

NEW YORK, Nov. 16.—The cotton market opened steady at unchanged prices to a decline of 29 points under Liverpool selling and overnight selling orders brought in by the sharp break of vesterday afternoon. Wall street and local houses were good buyers however, on the unfavorable weather news and reports from the Southwest denying vesterday's rumors that banks were calling loans on cotton in that section. After selling at 17.80c on the

call, January advanced to 15.12c and March from 17.53 to 17.85c before the end of the first hour, with active months generally showing net advances of II to 30 points. Near months were relatively firm, with December leading the advance on covering by shorts. Railies in foreign exchange rates and the better early tone in stocks and grain helped to steady prices after the opening. Generally Higher.

better early tone in stocks and grain helped to steady prices after the opening.

Covering by near month shorts was particularly active during the first hour and December was relatively firm, selling up to 18.65c or 45 points net higher, while later months showed advances of 26 to 25 points with January selling at 18.13c and March at 72.88c. Liverpool showed continued weakness, selling a good deal of January and March here, however, and the market turned easier during the middle of the day under liquidation and reports of easier spot basis in the Southeast, January sold off to 17.58c, or 17 points net lower, while May and July contracts made new low ground for the season with May selling at 17.35c.

March also made a new low record during the middle of the afternoon, selling at 17.38c with January or later deliveries showing net losses of 25 to 30 points, while December held around last night's closing. Weakness in New Orleans colored the talk of an easier spot basis.

Futures closed barely steady at decline of 5 to 45 points.

Everybody Would Have "Sidewheeler" If Earth Stopped

CHAMPAIGN, Ill., Nov. 16. (By Inernational News Service.) - Here's comething to worry about, and it asn't a thing to do with Article X f the league of nations.

If the earth were to stop rotating we would all become dizzy and start o walk in a circle. 'Sfact! In support of the statement we have the word of the eminent Dr. Coleman R. Griffith, department of psychology niversity of Illinois. Dr. Griffith has been experimenting

on the equilibrium of white rats for the past six months. The rodents were kept in a continuously rotating age and upon being released walked irclewise.
The work is related to the problem of equilibrium among aviators, and the facts thus far established, Dr. Griffith says, bear out those gained from experiments with human be
