Combination Money-Saver

This Will Be a Long Cold Winter 🖊

senced by the way they are disposing of their small stoves and buying the Howe Ventilator. the largest clase Burner in the world. The Howe was made in response to a general clamor for a larger Base Burner by people who have tried the different sizes and found that the larger the sizes and found that the larger the size of the Howe is not the important feature. The important feature is the way it distributes heat to all parts of the house. It is made different from others and works different. It is the only Base Burner made that has a double base, generating twice the heat in the base that any other does. It is the only Base Burner made that has a double heating, ventilating and circulating system in one stove. It has many other features too numerous to mention here that others caven't got. Call and see how it is made different from others. This is made different from others. This is what people who are using the liowe say about it: The Howe was made in response to a

Mr. Van Sickle, 1701 N. 23d, South Omaha.—"We heated five rooms with two and a half tons of coal last winter and kept every room equally warm while our other stove burned nearly four and a half tons and then did not warm all the rooms." Mr. Peterson, 1102 Miller—"Our house was never as warm in the winter as it is since we are using the Howe and we never burned as little coal. We could not distribute
