### TO CULTIVATE ALL THE LAND IT OWNS

Goodyear Rubber Co. to Erect Bunkhouses for Men Who Wish to Till Soil.

### LAND SURROUNDS A LAKE

Complying with the war-time call from Washington to "protect the food supply," the Goodyear Tire and Rubber company is already getting into intensive agriculture, in addition to its many other activities. Every foot of ground the company owns and that is not needed immediately for building purposes will be placed under cultivation at once. Fortunately the company has available many hundreds of acres of rich land right now. This land, which was acquired recently, surrounds a lake which is to be used to form a big reservoir for supplying water to the factory.

The Wingfoot Clan, Goodyear's factory newspaper, describes the patriotic venture thus:

"The work will be in charge of the labor department. Goodyear men who wish outdoor work and who wish to undertake this patriotic work for the growing season are requested to fill in the blank and send it in.

Great for Onions. that is not needed immediately for

Great for Onions.

Great for Onions.

"The land at Fritch's lake comprises farm land, orchard and woodland. Over 100 acres can be cultivated immediately and we can quickly clear any additional land needed. Between fifty and sixty acres is the finest muck and will grow huge crops of onions and like garden produce. The principal crops will be potatoes, navy beans, wheat, corn, peas, etc.

"Bunk houses will be cretted at the lake to house the men at work on the farm."

Goodyear offers this as a sugges-

Goodyear offers this as a sugges-Goodycar offers this as a sugges-tion to other patriotic manufacturers who have tillable land now lying idle. In addition to becoming a farmer itself the company advises every one of its employes who has a home to plant all the garden possible this year. The editor says in conclusion; "Every bit of food which can be raised is needed to prevent a scarcity of foods and aneven higher cost of living than we are now experiencing, during the coming year."

### O-L-D Highway Will Hold Annual Meeting at McCook

The annual meeting of the Omaha-Lincoln-Denver Highway association will be held at McCook, Neb., May 15.

May 15.

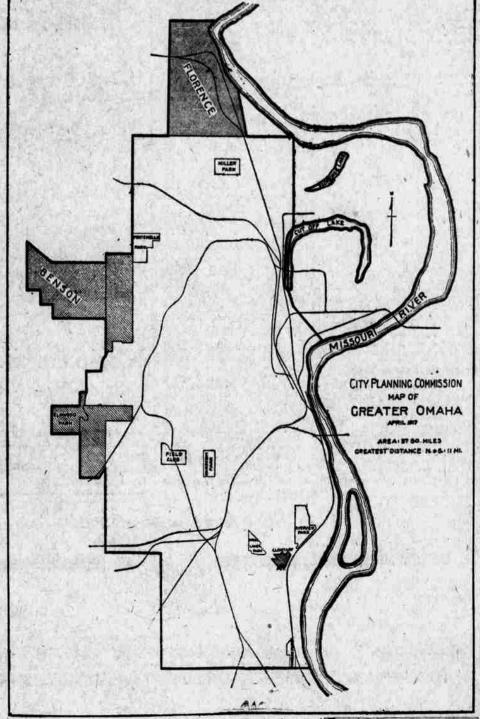

The advisability of adding "the Buffalo Bill Trail" to the name of the highway is one of the subjects scheduled to come up for decision. Dr. G. A. Condra will give an illustrated lecture on practical road making under conditions existing in Nebraska.

Many good roads boosters in addition to delegates are expected to attent the meeting.

### Snow Does Not Stop the

Carl Changstrom says that even the inclement weather of the last week-did not keep the dealers over the territory from coming in and driving away Allen cars. He reports two driven out to Holdrege, one to scottsbluff, one to Grand Island and have to Scottia.

Here is the Way Omaha Will Soon Look

Greater Omaha, with Florence and Benson annexed, will be cleven miles from the north limits of Florence to the present southern limits of the present southern limits of the city council annexed three strips, viz. Between Benson and Omaha, in the city council annexed three strips, viz. Between Benson and Omaha, in the city council annexed three strips, viz. Between Benson and Omaha, in the lemmond park district and Color in the Elmwood park district and Color into fame by knocking out Chip reports of the city fegal and Benson will have been legally annexed before June 1. A population of nearly 7,000 and four schools will be added to Omaha.

Chip will again battle Al McCoy in Brook

New Type of Frame

Used on Monroe Car

One of the most annoying troubles found by motor car drivers up to the present time, appears to have been satisfactorily eliminated from the new Monroe touring car.

With the older forms of frame construction a very rigid body has been in the same of the means not only an exceptionally struction a very rigid body has been in the same of the average frame. This means not only an exceptionally struction which sells for less than \$3,000\$. It is the new Monroe touring car.

## THE FRANKLIN CAR

WHY is the upkeep of the average automobile greater than the owner expected?

If we were to cram the answer into one sentence, we would say:

Because the average owner doesn't know, before he buys, the relation between the weight of a car and the cost to operate that weight.

### When Weight Is Superfluous

We ask this: Does it seem fair that the great majority of motor-ists must learn what constitutes superfluous weight only by hav-ing experience with it?

The Franklin owner is protected against any such condition, because, for 15 years, the service the Franklin Car has given has been based on Scientific Light Weight.

The weight of the Franklin Touring Car-2280 pounds—is his weight standard for any open car, and the weight of the Franklin Sedan-2610 pounds—his standard for enclosed cars.

### Results You Can See

He knows how useless is the weight of 177 water-cooling parts eliminated by Franklin design.

One big source of repair bills and depreciation wiped out at one strokel

He knows how Scientific Light Weight puts his car in the twenty-miles-to-a-gallon-of-gasoline and 10,000-miles-to-a-set-of-tires,

He knows how the rack and strain, the wear and tear of heavy weight is avoided by light, flex-ible construction.

### Foreknowledge

Investigation of weight discloses to the Franklin owner all the facts about operating cost, com-fort, safety and reliability, before

Franklin Scientific Light Weight means something to the man who regards his money as worth face value.

# HIS new five-passenger Paige Linwood "Six-30" quality has simplified the actual physical effort of driving a motor car. We have tried to design and manufacture in this Linwood a car which a woman or youngster can drive with ease and safety. See the Linwood, ride in it, drive it and see whether or not we have succeeded. The motor is tremendously powerful and flexible. The ges shift noiselessly with a pressure of the finger. The brake is quick, easy and sure. The entire control will give you a new conception of pleasurable and luxurious driving. You will not only enjoy it, but you will be proud of the Linwood, because, in addition to its mechanical excellence, it is a Paige—"The Most Beautiful Car in America."
